Our Experience

Consulting services directed towards the evaluation and monitoring of NGO projects (2004-2010)

We offer our services with the goal of evaluating the level in which the objectives and results originally predicted by the NGOs are achieved by the implemented projects/programs, and thereafter contributing valuable conclusions and recommendations.

Our services include external and mixed evaluations provided before, during and after the implementation of the projects/programs.

We evaluate progress towards the achievement of the objectives and results initially defined, verifying the technical methodology applied during the direct monitoring of the project/program, and thus we strengthen lessons learned and recommendations for the enrichment of the management of the project/program and the improvement of its approach to the Matrix of the Logical Framework.

During the past few years, we have evaluated projects related to the following fields of work: the empowerment of women; public health; prevention, treatment and follow-up of HIV/AIDS; Post disaster reconstruction and rehabilitation; Microcredits; Development of small businesses; education; potable water distribution; strengthening of public organizations; Development and organizational strengthening of small and medium sized businesses.
